**Research Fields** Architecture, Art and Science

**Keywords** traditional architecture, design technique, history and culture

### ● Research Outline

#### Appropriate evaluation of historic architecture

Recently prefectural and city governments began to realize importance of city planning using historical resources and historic architecture for local tourism resources. But, even its owners, it is hard to discover the potential in history and culture of traditional architecture. Through analysis of the historical records, actual measurement, our research point out characteristics, originality, design technique, craftsmanship and so on of historic architecture. Such kind of appropriate evaluation helps its conserve and repair.
